**RE: Jediah Cumbermack 2025 Season Review and Achievement Summary – British Superteen Championship**

Dear Selection Committee,

This letter is a formal update of BMRA member, Jediah Cumbermack, and his past season's performance in his first international UK championship. In his debut season in the 2025 AJN Steelstock Kawasaki British Superteen Championship, Jediah emerged as a resilient and high-potential talent within the Rokit Rookies development team. Despite facing significant physical hurdles, his performance trended upward throughout the year, marking him as a "quick learner" on the demanding UK circuits.

**Final Championship Standing -** 12th overall out of 22+ international riders
**Best Race Finish -** 6th place (achieved at Donington Park and Oulton Park)
**Best Qualifying** - 6th place (Oulton Park)
**2x Teng Tools Rider of the Round –** rounds 5 and 7 (Donington and Oulton Park)
**Rounds Completed -** Completed 8-10 rounds (missed two due to injury)

Jediah's 12th-place finish is particularly impressive given that he missed multiple rounds due to a broken wrist. His ability to return to the grid and immediately compete for top-ten positions showcased elite determination. His results showed a clear trajectory of improvement as he adapted to the UK tracks. His best finishes (6th place) came in the latter half of the season at iconic circuits like Donington Park and Oulton Park.

Even in challenging rounds like Brands Hatch, he secured solid top-12 finishes, demonstrating that he could maintain a competitive pace despite mechanical issues and unfamiliarity with technical blind-corner layouts.

Transitioning from tighter American tracks (MotoAmerica Junior Cup) to the long, sweeping corners of British circuits, Jediah was praised by his team and sponsors for being a fast learner, often cutting significant time off his laps between practice and race sessions (an average of 3 seconds improvement over the season in fact).

At Donington Park, he battled for podium positions in the early stages of the race and secured the 6th fastest lap of the entire field, proving he has the raw speed to run with the front-runners. Jediah was twice recognized by global tool giant Teng Tools as the standout performer of the weekend. The first was at round 5 at Donington Park and the second at round 7, Oulton Park. This award highlights his technical precision and his ability to out-work the competition.

Jediah has now "ticked the box" of being a top-10 contender in a major British championship. Moving into the National Junior Sportbike class for 2026, he is no longer a "rookie" to the UK environment. I hope to see Jediah represent his country well for the 2026 race season and I appreciate your continued support.

Kind regards,

Patrina Cumbermack
